M&K RECOVERY GROUP KEEPS OVER 200,000 POUNDS OF E-WASTE OUT OF LANDFILLS DURING FIRST TWO QUARTERS OF 2008

Exceeds e-cycling volume expectations, expands employee base to meet increased demand

Andover, Mass. – June 30, 2008 – M&K Recovery Group (www.mkrecoverygroup.com), a precious metals refining and computer recycling specialist drawing on more than thirty years of global expertise, announced today its 2008 progress to date in keeping hazardous materials out of landfills. During the first six months of 2008, M&K destroyed and recycled more than 150,000 pounds of circuit board scrap and more than 80,000 pounds of hard disk drives and tape media. These items can contain a host of hazardous or toxic materials such as lead, mercury, cadmium, chromium, beryllium and flame retardants.

“As awareness of the need for thorough recycling of all electronic components grows, we’re proud but not entirely surprised that our e-cycling volume is up ten percent over the same period in 2007,” said William Rockett, Vice President, M&K Recovery Group. “The overall increase in demand for our services has led us to add procurement specialists to our staff and we expect to grow the business significantly overall within the calendar year.”

Materials recycled by M&K include:

- PC Laptop Server Mainframe
- Hard Drives Optical Drives Tape Drives
- LCD CRT Plasma Displays
- Network Telecom Phone Systems
- Printers Copiers
- Circuit Boards Cables Power Supplies Batteries
- IC CPU Memory
- Cell Phones Handheld Devices
- Consumer Electronics Automotive Electronics

M&K’s EPA-compliant, “Chain-of-Custody” environmental management system assures customers that their IT assets are disposed of properly. De-manufacturing and segregation of material is conducted in an EPA-permitted facility, in both the Boston-area and Austin locations. Auditable bar code tracking of product ensures final disposition of all hazardous and non-hazardous material recycled. All of these factors result in full accountability and eliminate potential risk and liability.

About M&K Recovery Group

M&K Recovery Group is proud to be a family business that helps global customers manage electronics and precious metal waste. Founded in 1995 by CEO Donald J. Decareau, M&K has built upon its legacy in refining and recycling by adding data destruction services for corporate and government clients. Operations performed on-site include precious metals refining, computer/electronics recycling, and NSA-approved data destruction. M&K’s second processing depot in Austin, TX is outfitted for de-manufacturing and hard drive and tape media

destruction. M&K's proprietary "Chain-of-Custody" asset management system and downstream reporting ensures environmental compliance and final disposition of all materials processed. For more information, visit www.mkrecoverygroup.com.
